1 Security Categorization

1.1 Reference Standards

- FIPS 199: Security categorization for federal systems.

- NIST SP 800-60: Mapping security categories to information types.

1.2 Impact Levels (Confidentiality, Integrity, Availability)

1.3 Overall Categorization

1.4 Justification

2 Risk Management & Compliance

Alignment with Risk Management Framework (RMF) per NIST SP 800-37. Categorization informs security control selection (NIST SP 800-53). Ongoing assessment and mitigation per FIPS 200 minimum security controls.
